Ref: Two Ashes

Dear Peter & Shaun

Thank you for your valued enquiry regarding the 3 concrete columns in Two Ashes.

The current columns are concrete construction, we would supply and install new 5m galvanised steel columns with new LED lanterns.

We would also need section 50 permits from Shropshire council so we can dig in the footway to install these columns and WPD would need to transfer the current underground service from existing column to new for 1 of the columns. We can do the transfer ourselves for the other 2.

We don't have a pricing template for WPD on their charges but believe you have applied for this before (at Yewtree) so maybe know the cost.

**Cost**  
**£4,079.00**  
**Plus VAT**

Kind Regards  
Andy Vaughan
