

## Bayston Hill Streetlight summary

The current population of Streetlights under the control of the Parish Council are **228\***.

In 2019 there were approximately **226 columns with 57 LED's** (2 columns had been missed off the original survey)

Bayston Hill now has a population of **138 LED's** and their growth has been as follows,

Between **2019 and 2023, an additional 40 columns** were converted

**2023 we converted 9 and in 2024, 32, leaving a balance of 90 columns with original lighting.**

Conversions have been carried out when original parts have become obsolete and/or when light assemblies have been beyond repair. In late 2024 a total of 13 columns were replaced due to foundational issues and these were upgraded to LED where applicable. **A conversion of an existing column to LED including a photocell currently costs £329.00 ex VAT.**

Shropshire Council are updated with the conversions so the correct electricity consumption charge can be levied quarterly.
