# DRIVEN TO PROTECT THE ENVIRONMENT

The cost of clearing roadside litter is almost **£1 billion** annually in England & Wales - **enough to build four large hospitals every single year.**

**LEAF** has been involved in running really successful pilot schemes which are very popular with both business and residents in areas keen to encourage both visitors and business in their local area.

**LEAF** is in the process of mobilising volunteer groups across the regions to cut this cost and to cut out all roadside litter build up.

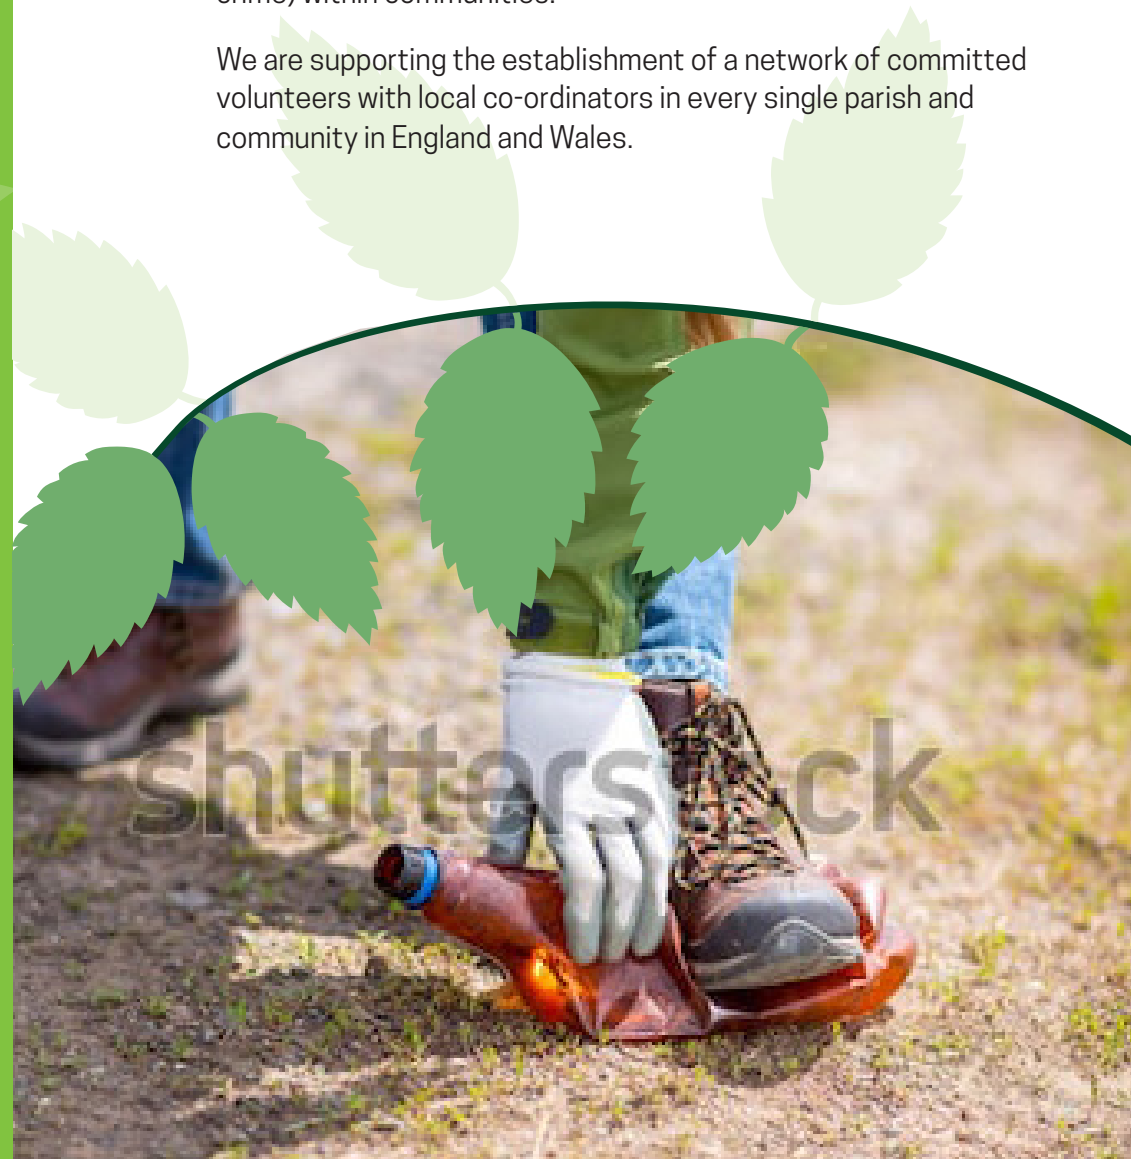

## ACTION

**LEAF** wants to support communities keen to restore civic pride and reduce vandalism and property related crime such as fly tipping and theft. We want to reduce the incidence of roadside litter by clearing it up quickly which has been shown to steadily reduce littering and associated activity (such as fly tipping and crime) within communities.

We are supporting the establishment of a network of committed volunteers with local co-ordinators in every single parish and community in England and Wales.

# SUPPORT REQUIRED

Supported locally by the

National  
Trust

**LEAF** requires a combination of both promotion throughout the regions via key support groups involved with land management and corporate sponsors interested in reducing the negative impact of littering especially those involved in the fast food and the canned and bottled drinks sectors whose packaging creates the majority of roadside litter.

**Please contact LEAF today without obligation to help this really worthwhile scheme which will benefit every single community.**
